

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

"A boy's heart craves a hero; and he believes in his hero with all the beautiful literalness and seriousness of early childhood. . . . If, to divert him after his arithmetic and grammar are over, you offer him a story of children with a low standard, he, too, will adopt a low standard. He will rest satisfied with his pertness, his slipshod good-nature, his bad breeding; he will not care a fig for such superfluities as discipline, endurance, modesty, or reverence."

PREFACE

This list has been prepared as a help in buying books for the smaller public libraries, and also for the home use of fathers, mothers, and teachers, but not for children themselves, who do not like explanatory notes. It includes stories which broaden the horizon of children, cultivate their imagination and love of nature, and add to their stock of general knowledge. It contains also the historical tales and traditions that are the common property of the world, without which it is impossible to understand a sermon or the editorial page of a great daily newspaper. Textbooks, histories for older readers, and many books revised or compiled for supplementary reading in schools are omitted for two reasons: one that they are usually in unattractive editions, the other that they are in school and public libraries. A few stories of modern life that have become general favorites, even though they have faults of style like "Little women," or a sensational plot like "Little Lord Fauntleroy," are in the list, for the sake of the happy, useful home-life of the one and the sunshiny friendliness of the other. Most of the tales of home and school are those in which children lead simple, sheltered lives. Stories of the present day in which children die, are cruelly treated, or offer advice to their fathers and mothers, and take charge of the finances and love affairs of their elders, are not good reading for boys and girls in happy homes, and the favorite books of less fortunate children are fairy-tales or histories rather than stories of life like their own.

The bookish child is growing out of favor as the interests of child-life increase, and is now encouraged to use his hands in weaving baskets or taking photographs, instead of absorbing everything between the covers of the family collection of books.

"Bookishness is probably a bad sign in a girl; it suggests artificiality, pedantry, the lugging in of dead knowledge," says one author, but it is on account of the non-bookish tendency of to-day that the amount of general, literary, and biblical information which the high school or even college graduate of the twentieth century possesses is often alarmingly small.

No college English, no finishing-school course in art or literature, will ever give men or women what they might have had if books had been as much their friends in childhood as the children next door. "I have never thought about making a friend in a book," is one of the commonest answers to the question, "Who is there in a book whom you would like to have for a friend?"

A child's library need not be large. Half a dozen new books a year are enough for him to own. "I have no favorites, for I never read a book twice," is what many boys and girls say in answer to questions asked by teachers or librarians about their reading. A book should be something to be thought about and desired before it is a Christmas or birthday gift. I have known one family where the birthday of a baby who had died was always kept in mind by a present of a book to every one of the other children.

Some titles included in the following pages have proved their permanent value by being children's favorites for a generation or more. A child who does not know Rosamond's day of misfortunes, or Beech-

nut's embellished stories, or the resourcefulness of the Swiss family Robinson, loses as much as if he were ignorant of Hamlet, or Dominie Sampson, or Mr. Micawber. There are other books of the first half of the nineteenth century which it is to be regretted are out of print: like Lydia Maria Child's "Flowers for children" and "New flower for children" in which are "Lariboo," an adaptation of Balzac's "Passion dans le désert" that gives a child a more vivid impression of the Sahara than any geography, and her "Royal rosebud," that makes the princes in the Tower and their sisters real living children; Harriet Myrtle's "Country scenes" and "Man of snow," full of happy home-life, detailed description, and amusing incident; and Richard Hengist Horne's "Good-natured bear," one of the many talking animals of literature. These books, although out of print, may still be picked up in second-hand shops, and will delight the children whose fathers and mothers read aloud.

Some volumes reprinted within a few years are Grace Greenwood's "Merrie England," "Bonnie Scotland," and "Stories from famous ballads."

Many children got from them vivid first impressions of Shakespeare and his birthplace, Byron and Newstead Abbey, Robin Hood and Maid Marian and the great outlaw's death, Guy of Warwick, Lady Jane Grey, and Arabella Stuart; of the Burns and Scott country, Alloway Kirk, the haunts of the Guidman of Ballangeich, Stirling Castle, and Abbotsford; and of the heroism of Scotch girls like the Margaret who died a martyr to her faith on Solway Sands, Grizel Hume keeping her father alive by carrying him food in the old vault in Polwarth churchyard, and Grizel Cochrane robbing the mails to

find her father's death-warrant. Lady Jane Beaufort, with her golden hair in a net of pearls and sapphires, walks in the garden of Windsor Castle before the window of the royal prisoner, James I of Scotland, and long years afterwards Catherine Douglas thrusts her slender arm through the staple of the door in the vain hope of saving them. Sir Patrick Spens and his Scots lords go down in the storm, the Heir of Linne, trusting his weight to the rope which he hopes will hang him, brings down the ceiling that hides the key to his father's missing gold, and the Saracen lady wanders from Stamboul to England, repeating the two words "Gilbert" and "London" till she finds her English lover.

I know no children's books which open the doors to so many stories from history and of famous places, or excite in a child's mind so great a desire to see, to know, and to read, as these half-forgotten little volumes; and, if teachers were familiar with them, they could use them every day, to widen the schoolroom horizon.

The list is the outgrowth of a small pamphlet, few copies of which exist, compiled in 1882 at the request of Frederick Leypoldt, of the Publishers' Weekly and American Catalogue. Some of the books recommended in the pamphlet are out of print, but it is interesting to note the large proportion of titles now generally agreed on by librarians as necessary for even the smallest library for children. The list of 1882 has few books for very young children and a larger number written for grown-up readers than the present collection, of which boys and girls with a power of assimilating print meant for their elders will have read all that interests them before they are fifteen.

A child who is a real book-lover is like Paul, in "Con-

cerning Paul and Fiammetta," who, when asked to promise not to read any more of his mother's books without permission, answered, "It's no use my promising, not one bit, I shouldn't keep it. Whenever I went into vat room and saw all the dear darling books beckoning, I should go to them — I know I should. Books isn't meant to sit on shelves all by themselves." He will be ready for grown-up books when others of the same age are stumbling through children's easy stories, but if his early reading has been of the best, he may be safely trusted to find his own way among great authors.

There has been no attempt to classify books for different ages, except as in earlier editions, by marking *c* against those for children under ten.

Years of observation of boys and girls show that a child of twelve or thirteen from a bookless home has often no power of absorption in a story or interest enough to finish one more difficult than the most simplified fairy tale or a book of the "Peter Rabbit" type, while on the other hand a boy of eleven, living under similar conditions, once in a while astonishes a teacher or children's librarian by asking, after reading a Henty book, the exact status of a house-carle or the money value of a talent.

The list has been compiled for children between these two, normal and well-nourished in body and mind, whose fathers and mothers wish to give them the best books that they can afford to buy.

Hanford Henderson says, "As things go, Jack's best chance is in an average middle-class family, for here he has the discipline of required service, and at least the hazard of gentle example." But he adds, "If I were sure of having Jack with me during the high-

school period, from fourteen to eighteen, I would much prefer that at fourteen he should not know how to read." All boys cannot have such teaching as Mr. Henderson's, and the use of books as tools must be learned young if it is to be serviceable to them under ordinary high or preparatory school conditions. A part of the business of being a father or mother is to give children an equipment of general knowledge that will make school work neither burdensome nor stultifying, and much of this knowledge may come, and indeed must come, from right training in the use of books.

Mothers with a vague idea that their children of ten or twelve ought to read something "instructive" often go to the nearest library for histories, which the children promptly refuse to open. The librarian asks what they have read before, and learns that all the books they own or borrow are in endless series, cheap and slovenly in style, melodramatic in incident, with young heroes or heroines whose wisdom or judgment are far beyond their parents'. After several years' reading of this kind, a boy or girl has of course no power of enjoying a story of a higher type, and at fifteen cares for no books except the latest "best sellers." The series habit should not be encouraged. A few of the best, to be read over and over again, may be in a child's library, but the money that the ordinary series costs is far better spent on books that make a child happier and more intelligent through his whole life, and give him the power of discriminating between a good and poor story.

In buying books for children, there are many things to be taken into consideration — a child's own likings most of all. There is a time in every girl's life when

she loves boarding-school stories, many of which are weak or cheap in sentiment. College stories belong to a stage a little later in her development, and are not usually included in books for boys and girls.

Some of the books of the earlier lists are out of print, and have therefore been omitted. Others have been superseded by better works on the same subjects.

The best books for a child are the books that enlarge his world. A man or woman in middle life or old age who loves poetry and great pictures and statues, is familiar with Shakespeare, and has historic sense, imagination, a sense of humor, and a love of nature, is full of resources and the joy of living. No one can ever have the fulness of these resources and that joy who has not had them from earliest childhood. Some books that enrich children's lives are:—

1. A good collection of poetry, of which several have been published within a few years.

2. A collection of prints from great artists.

3. An edition of Shakespeare in good type and full of pictures, but not too expensively bound to handle as freely as the Mother Goose which a child should know by heart at six years old.

4. A collection of historical pictures. Temple's "English history as pictured by famous painters," published by Newnes of London is, I believe, out of print, but good substitutes for it can be made by mounting pictures from periodicals and looking among book-sellers' stocks of prints from art magazines. The Longmans series of twelve wall color-prints from English history, in a portfolio for \$10.50, may be bought one at a time and hung in a frame with a movable back.

5. A collection of fairy-tales, folklore, or myths,

like the Arabian Nights, Grimm, or Andersen, Andrew Lang's many-colored fairy books, Hawthorne's "Wonder book and Tanglewood tales," or Miss Mulock's "Old, old fairy tales."

6. A book full of absurd fun, like Lear's "Nonsense book," Carroll's "Alice in Wonderland," Peter Newell's "Topsys and turvys," or Carolyn Wells's "Nonsense anthology," which give children a standard for judging humor, and cultivate a sense of nonsense that will help them over hard places in later life.

7. Out-of-door books, like Schuyler Mathews's "Familiar trees and their leaves," Annie Huntington's "Studies of trees in winter," Mrs. Parsons's "How to know the wild flowers," Neltje Blanchan's "Bird neighbors," and Olive Thorne Miller's "First" and "Second book of birds," besides some volumes in the Nature Library, which may be bought one at a time and often at reduced rates from booksellers' catalogs.

All these books should be on low open shelves where children can reach them and learn to treat them well. Some of them will wear out, but have them rebound or get another copy. As Ruskin says in regard to other reading, "Of course you must or will read other books for amusement, once or twice; but you will find that these have an element of perpetuity in them."

In choosing the books of the last ten years, I have had in mind, therefore, neither the children who read no books except from public or school libraries, nor the others, even less fortunate, who have so many finely illustrated volumes that they do not treat them as friends, but merely as the acquaintances of a day, to be sent before the next Christmas or birthday to a settle-

ment or orphan asylum, not cherished and read over and over till learned by heart, kept in good condition and shown as heirlooms to the owner's children and grandchildren. How many copies of the first edition of "Alice in Wonderland," that now brings hundreds of dollars at auction, have been destroyed in public libraries by children who could not appreciate them or even handle them carefully? A public library should buy the best books that children will read, in as attractive form as it can afford to discard and renew when soiled and torn; but it is not worth while to spend money on costly editions for boys and girls who do not know how to take care of them, and bring them back in such condition after one or two readings that they are not fit for circulation.

There are still children in existence who are taught to love books and handle them carefully, to whom a well-illustrated book with colored pictures is a lasting joy, and whose story-book friends are as real as the children next door. A little girl, uttering ecstatic squeals and croons of delight over the new doll she found sitting under the Christmas tree, stopped long enough to say, "Oh, she has a complete wardrobe, just like Christina's doll in 'The doll doctor,'" and another calls all the furniture and toilet appliances in her room by the names that Betty's mother gave them in "A happy little time."

The mother of two children of four and five, who had a screen with Walter Crane pictures pasted on it, one day heard a voice say "Wake up, dear Princess," looked behind the screen and saw the little girl playing the Sleeping Beauty, and the boy bending over her as the Prince, to give her the awakening kiss.

A boy still in petticoats strayed away from the rest of the family, while making a steamboat trip along the coast, and was found pointing out the glacial scratches on the rocks near the shore to a group of passengers. This was because his grandfather had taught him to read in the same story-book that "Nature, the old nurse," showed the baby Agassiz, "the manuscripts of God," and the child had learned the alphabet of the glaciers' language before he could read his own, but was soon ready for books that would help him identify rocks and stones. Another boy, to whom a fine copy of Harris's "Insects injurious to vegetation" had been given, learned to read because he had seen the book referred to when he took a caterpillar into the house and asked its name.

In the words of Dr. Berle, "Every time you link some bit of permanent knowledge, some fragment of literature, some incident of history, some discovery of science with some distinct imaginative interest of the child, you have planted a seed which is sure to be fruitful in many ways."

It is to be regretted that some favorite books have now disappeared from the market, although a diligent reading of second-hand, remainder, and auction catalogs often rewards a seeker for volumes that an ordinary bookseller names "shorts." Two of these books are Mrs. Fairstar's "Memoirs of a London doll," which was reprinted by Brentano in 1893, and Mary Frere's "Old Deccan days," reissued by McDonough of Albany in 1897, after it had been published by Lippincott about 1868. It has been freely drawn upon in Miss Tappan's "Children's hour," and Mrs. Wiggin's "Fairy ring," "Magic casements," "Tales of wonder,"

and "Tales of laughter," and households need not be deprived of the joy of knowing the story of the camel who always liked to roll a little after dinner, of referring to anything unknown and fearsome as a "perpetual dripping," or of reminding the loud-voiced that they are talking like the alligator when he tried to make his tones gentle.

In the ten years since the last revision of "Books for boys and girls," several new subjects have become interesting to them. Airships, electrical inventions, motor-boats, Boy Scouts and Campfire Girls, dramatized versions of folktales, patriotic plays, suggestions for pageants, are all represented in publishers' catalogs, and endless series of stories, many of them worthless, others of varying degrees of merit, tell the adventures of young aviators, electricians, motor-boat crews, scouts and maidens with Indian names and costumes. A good list of the best books about and for Boy Scouts, prepared by the officers of the organization, may be found in any public library or by writing to Boy Scouts of America, National Headquarters, 200 Fifth Avenue, New York. There are not as many books for Campfire Girls, and none of the stories for them are of remarkable merit, but a list of books on both indoor and out-of-door subjects recommended by the heads of the organization is in print.

In the last few years holiday library exhibits have shown the best and most expensive editions of old favorites or the new books of the year. Indeed, a children's librarian has told me that she has many times regretted the little attention paid in such displays to the wants of mothers with large families and small incomes, who often go away without help or

encouragement. A department-store book counter often has much that is worth buying, varying in price from ten to twenty-five cents a volume, side by side with the poorest series and the trashiest picture-books; and any one who is willing to spend a little time, patience, and judgment at such a counter before the Christmas rush begins, or watch for mark-down sales in the bookshops, can find treasures undreamed of, even pretty and well-illustrated editions, bound well enough for family, but not always for library use.

In our own Christmas exhibits, and in talks to mothers' clubs in town or country, we always show as good cheap editions as we can find, in a collection known as "Fifty must-haves," which includes books generally agreed upon by libraries for purchase.

Stories of early England.

"The average normal child will not be bookish, but should read and write well, know a few dozen well-chosen books, play several dozen games . . . should know something of several industries and how to make many things he is interested in . . . know much about nature in his environment, be able to sing and draw, should have memorized much more than he now does, and be acquainted at least in story form with the outlines of many of the best works in literature and the epochs and persons in history. Something is amiss with the lad of ten . . . who turns away from stories that reek with gore. Such a boy is either undervalued and anæmic and precocious by nature, a repressed, overtrained, conventionalized manikin, a hypocrite as some can become under pressure thus early in life, or else a genius of some kind with a little of all these."

G. STANLEY HALL. *The psychology of adolescence.*

"Whether the book is alive with genius or dead with the lack of it, whether it be brilliant or commonplace, whether skill or clumsiness appears in its construction, are not the first questions to be asked. The prior question, as I conceive, is this: *Does the book leave any kind of fine and wholesome feeling in the mind of one who reads it?* That is not a question concerning the mere morality of the book, in the conventional meaning of the term. It touches the whole quality of the work as one of true literature. 'Does it leave any kind of fine and wholesome feeling in the mind of one who reads it?' There is no mistaking a feeling of that nature, though it may never seem twice the same in our experience of it. Sometimes it may seem to us as though we had eaten of good food; at other times like the tasting of wine; at others, again, like a draught of water from a cool spring. Some books that we read will make us feel that we are lifted as on wings; some will make music within us; some will give us visions; some will just fill us with a happy content."

J. N. LARNED. *Books, culture and character.*

The nine volumes of *Our young folks, 1865-1873*, may be bought bound for nine or ten dollars from the Boston Book Company, 83-91 Francis Street, Fenway, Boston, or from other dealers in magazines. Dickens, Longfellow, Lowell and Whittier wrote for it, and Tom Bailey and the Peterkins made their first appearance in public in its pages.

Theodore Roosevelt says in his autobiography:

"As a small boy I had 'Our young folks,' which I then firmly believed to be the very best magazine in the world — a belief, I may add, which I have kept to this day unchanged, for I seriously doubt if any magazine for old or young has ever surpassed it.

"'Cast away in the cold,' 'Good old times or Grandfather's struggle for a homestead,' 'The William Henry letters' and a dozen others like them were first-class, good healthy stories, interesting in the first place, and in the next place teaching manliness, decency, and good conduct. At the cost of being deemed effeminate I will add that I greatly liked the girls' stories 'Pussy Willow' and a 'Summer in Leslie Goldthwaite's life,' just as I worshipped 'Little men' and 'Little women' and 'An old-fashioned girl.'"

RELIGION

"Father made me learn so many Bible verses every day that by the time I was eleven years of age I had about three-fourths of the Old Testament and all of the New by heart and by sore

flesh. I could recite the New Testament from the beginning of Matthew to the end of Revelation without a single stop. The dangers of cramming and of making scholars study at home instead of letting their little brains rest were never heard of in those days."

JOHN MUIR. *The story of my boyhood and youth.*

"I give you the end of a golden string,
Only wind it into a ball,—
It will lead you in at Heaven's gate,
Built in Jerusalem's wall."

CHRISTMAS

“Villagers all, this frosty tide,
 Let your doors swing open wide,
 Though wind may follow, and snow beside,
 Yet draw us in by your fire to bide,
 Joy shall be yours in the morning.

 Blowing fingers and stamping feet,
 Come from far away you to greet —
 You by the fire and we in the street,
 Bidding you joy in the morning.”

FAIRY TALES AND WONDER STORIES

“Charlemagne’s camp,
Where the Paladins rally,
And the Diamond Valley,
And the Wonderful Lamp,
And all the wonders
Of Ganges and Nile,
And Haroun’s rambles,
And Crusoe’s isle,
And Princes who smile
On the Genii’s daughters
’Neath the Orient waters
Full many a mile.”

DENIS FLORENCE MCCARTHY. *A lament.*

The responsibility of deciding whether children shall read fairy tales belongs to fathers and mothers. In Mary Howitt’s “Children’s year,” a diary of the everyday life of her little boy and girl, Meggy “was very soon affected by any sorrowful story, and because her mamma feared that this sensibility might weaken her character, she did not often read to her the ‘Babes in the wood,’ or any sorrowful story which would make her cry, but, on the contrary, she liked her to hear pleasant tales, and natural history of all kinds. Herbert, on the contrary, was fond of all kinds of excitement. A horrible story put him quite into a state of agreeable terror; he liked, or rather he fancied he should like, to see strange and dismal sights. But he had had very little experience of anything that was dismal or horrible, so he was not a very good judge.”

There is the same difference in the children of every family. One of the Lang fairy books has been objected to by parents and teachers because of the horrors in

the story of the Sleeping Beauty, which, instead of ending like Tennyson's version with the departure of the happy princess and her lover, describes the enmity of the ogreish mother-in-law and her attempt at murder. This is only a translation of the original French version of Perrault. The "Mulock fairy book" omits the latter part of the tale, but includes the story of "The juniper tree," with an even more heart-rending plot.

The softened versions of fairy tales written by kindergartners are often pointless and unmeaning, and far from the racy eighteenth-century English of the originals. If fathers and mothers would watch the effect of a story on their children, and use some discretion in suggesting books from public library shelves, librarians' work would be less perplexing.

There is no better plea for fairy tales than Ruskin's, in his introduction to the edition of Grimm's German popular tales translated by Edgar Taylor and illustrated by Cruikshank. He says:—

"A child should not need to choose between right and wrong. It should not be capable of wrong; it should not conceive of wrong. Obedient, as bark to helm, not by sudden strain or effort, but in the freedom of its bright course of constant life; true, with an undistinguished, painless, unboastful truth, in a crystalline household world of truth; gentle, through daily entreatings of gentleness, and honourable trusts, and pretty prides of child-fellowship in offices of good; strong, not in bitter and doubtful contest with temptation, but in peace of heart, and armour of habitual right, from which temptation falls like thawing hail; self-commanding, not in sick restraint of mean appetites and covetous thoughts, but in vital joy of un-

luxurious life, and contentment in narrow possession, wisely esteemed.

“Children so trained have no need of moral fairy tales, but they will find in apparently vain and fitful courses of any tradition of old time, honestly delivered to them, a teaching for which no other can be substituted, and of which the power cannot be measured; . . . and the effect of the endeavour to make stories moral upon the literary merit of the work itself is as harmful as the motive of the effort is false. For every fairy tale worth reading at all is the remnant of a tradition possessing true historical value; historical, at least in so far as it has naturally arisen out of the mind of a people under special circumstances, and risen not without meaning, nor removed altogether from their sphere of religious faith. . . . The little reader’s attention should never be confused or disturbed, whether he is possessing himself of a fairy tale or history. Let him know his fairy tale accurately, and have perfect joy or awe in the conception of it as if it were real; thus he will always be exercising his power of grasping realities; but a confused, careless, and discrediting tenure of the fiction will lead to as confused and careless reading of fact. Let the circumstances of both be strictly perceived, and long dwelt upon, and let the child’s own mind develop fruit of thought from both.”

“O bright long paths to Fairytown!
What shining paths do I mean?
They are not gray, nor black, nor brown,
Nor blue, nor white, nor green.”

—*Spanish Riddle.*

APPLIED SCIENCE

"The best boys' books, . . . and also books on magic, like Hoffman and Hopkins, would be helpful in teaching problems of the lever, balance, wedge, pulley, pump, monochord, whistle, prisms, small lenses easily ground by boys, magic lanterns, kaleidoscope, telegraph, etc., which the normal boy would approach with a full head-pressure of interest."—G. STANLEY HALL. *The psychology of adolescence.*

Books of physical science written down to children are of little use to a boy who has an inventive and mechanical mind and is ready for the "Scientific American" or an electrical newspaper almost as soon as he can read.

Care should always be taken to buy only the latest editions of scientific and technical books.

"I would not buy anything that you are growing away from. I would rather buy something that you are growing up to."

JACOB ABBOTT. *Lucy at play.*

The "Masters in art" series is no longer published, but may still be bought in several volumes. The color in the "Masterpieces in colour" has been criticised, but it is the best series of reproductions in a form to interest children, not too expensive for them to handle. It makes a great difference in the intelligent appreciation of pictures in later life, and the power of recognizing the work of an artist by its style, whether a child has used volumes of reproductions from the great masters like any other picture-books, and never had to remember when he learned the difference between Raffaele and Reynolds, Velasquez and Van Dyck, an Italian primitive and a Rembrandt, which is no harder for a child to recognize than the style of Caldecott, Boutet de Monvel, and Rackham.

PLAYS AND OPERETTAS

So many stories have lately been dramatized for schools and pageants that only a few favorite books of plays are suggested for buying. The Dramatic League has published a list of plays for children, the Association of Neighborhood Workers has issued a Guide and index to plays, festival and masques (Harper, 25c), and "A selected list of plays for amateurs," compiled by Elizabeth A. McFadden and Lilian E. Davis, may be ordered for \$2.00 from E. A. McFadden, Box 328, Cincinnati. The Ben Greet edition of several of Shakespeare's comedies is very useful in coaching children and staging the plays.

"Children who have shown no particular gifts in ordinary studies not infrequently exhibit unsuspected powers in the dramatic field. Contrary to the usual belief, this work, instead of developing self-consciousness and a theatrical habit of posing, is a means of preserving the delightful unconsciousness and spontaneity of childhood."

**POETRY, SELECTIONS FROM LITERATURE,
AND STORIES ADAPTED FROM GREAT
AUTHORS**

"She had read them poetry until they were familiar with the English classics, and the names of the best authors of the mother tongue were like household words. She had taught them more history before they were twelve years old than most people learn after that age. Her way of inculcating knowledge was effective. If, in the course of her reading, she came across anything which struck her as remarkable and worthy of being remembered, she would take her book in hand, and go about the house until she found one or both of the boys; whereupon she would descend upon them, taking them captive, and then and there would read aloud for their especial benefit the matter in question. It made no difference what they were doing, or how important their occupation at the moment might be. They had to stop and listen. If they were playing ball in the garden, she would suddenly appear, with a volume of Alison's 'History of Europe,' Scott's 'Marmion,' Plutarch's 'Lives,' or Rollin's 'Ancient history,' and on the instant and, without preface, would proceed to business. At such a moment nothing could distract her attention. If the house should be on fire she would probably have concluded the passage from her favorite author before giving the alarm.

"As her taste was unexceptionable, her sons were thus early made familiar with the best thoughts of the best men; and as forty books may be read to find one worth reading, and as the great waste of an ill-directed education is in time spent sifting the bushel of chaff for the single grain, they had unconsciously made great advances by simply being guided in the right way."

STORIES OF HOME, SCHOOL, CITY AND COUNTRY LIFE AND ADVENTURE IN THE UNITED STATES AND ENGLAND

"If you find a twelve-year-old boy addicted to 'juveniles' and to nothing else, you may as well give the poor little creature up. He may in time become a tolerable husband and father, but his ears will be deaf to the music of St. Paul's Epistles and the Book of Job; he will never know the Faërie Queene or the Red Cross Knight, Don Quixote, Hector, or Ajax; Dante and Goethe will be sealed oracles to him until the end of time; the spaciousness of Milton will forever confound him, and he will never

'Hear, like ocean on a western beach,
The surge and thunder of the Odyssey.'

"He drank too long and too deeply of nursery pap, and his literary appetite and digestion are both weakened beyond cure."

KATE DOUGLAS WIGGIN.

Very few stories of school, home or outdoor life published in the last ten years have characters that are worth a place on the children's bookshelves with the book-friends who have stood a longer test.

The school stories, even of the better class, have a tiresome sameness, and very few of them are in this list. "The green C." and "The queens' company"

are admitted because they are nearer the every-day life of a high school than the stories of Lakerim, Lawrenceville, St. Timothy's or Hilton, or the many tales of girls' boarding-schools.

Story of Richard Doubledick.

Houghton, 50c

Trial of William Tinkling. Houghton, 50c

"Richard Doubledick" is a story of war and the forgiving of an enemy. The other small books are amusing extravaganzas, published long ago in "Our Young Folks" as parts of "A holiday romance."

"I was to feel that I had been born, born to a rich awareness, under the very meridian; there sprouted in those years no such other crop of ready references as the golden harvest of Copperfield."

INDIANS AND RANCH LIFE

"Now, with my little gun, I crawl
All in the dark along the wall,
And follow round the forest track
Away behind the sofa back.

"There in the night where none can spy,
All in my hunter's camp I lie,
And play at books that I have read
Till it is time to go to bed.

VOYAGES AND STORIES OF SHIPWRECK AND DESERT ISLANDS

Right Honorable, I do remember that being a youth, and one of her Maesties scholars at Westminster that fruitfull nurserie, it was my happe to visit the chamber of M. Richard Hakluyt my cosin, a Gentleman of the Middle Temple, well known unto you, at a time when I found lying open upon his boord certeine bookes of Cosmographie with an vniversalle Mappe: he seeing me somewhat curious in the view thereof, began to instruct my ignorance, by shewing me the diuision of the earth into three parts after the olde account, and then according to the latter, and better distribution, into more; he pointed with his wand to all the known Seas, Gulfs, Bayes, Straights, Capes, Riuers, Empires, Kingdomes, Dukedomes and Territories of ech part, with declaration also of their speciall commodities, and particular wants, which by the benefit of traffike, and entercourse of merchants, are plentifully supplied. From the Mappe he brought me to the Bible, and turning to the 107 Psalme, directed mee to the 23 & 24 verses, where I read, that they which go down to the sea in ships, and occupy by the great waters, they see the works of the Lord, and his woonders in the deepe, &c. (which words of the Prophet together with my cousins discourse (things of high and rare delight to my young nature) tooke in me so deepe an impression, that I constantly resolued if euer I were preferred to the Vniversity, where better time, and more conuenient place might be ministred for these studies, I would by God's assistance prosecute that knowledge and kinde of literature, the doores whereof (after a sort) were so happily opened before me.—RICHARD HAKLUYT. *Epistle Dedicatorie to The Principall Navigations, Voyages and Discoveries of the English Nation*, 1589.

SAINTS

The legends of saints are recommended not only for their beauty, but because it is impossible to understand or enjoy great pictures without being able to distinguish saints by their attributes. Whatever knowledge of and interest in Italian art I have is mainly due to my good fortune in being permitted at ten years old to read and handle freely a fine edition of Mrs. Jameson's Sacred and Legendary Art, Legends of the Monastic Orders and Legends of the Madonna.

HISTORY, HISTORICAL STORIES, AND BIOGRAPHIES *GENERAL*

So many historical stories and biographies for children are now in the market that there is great danger of too large a supply of them in school libraries and public libraries. High-school teachers often have to contend with a sloppy habit of reading and a superficial knowledge of too many books caused by too much supplementary reading in the grammar grades.

"Do not tell me that it is not education, and of the best, to enable a child to feel the passion and poetry of life; to live while it trudges along the dull, familiar streets . . . in that terrible, magnificent past, in dungeons and palaces. . . . I can speak very fervently of the enormous value for happiness of such an historical habit of mind. Such a habit transcends altogether, in its power of filling one's life, the merely artistic and literary one. . . . I would compare this historic habit rather to the capacity of deriving pleasure from nature, not merely through the eye, but through all the senses. . . . For, as the sensitiveness to nature means supplementing our physical life by the life of the air and sun, the clouds and waters, so does this historic habit mean supplementing our present life by life in the past, a life larger, richer than our own."—VERNON LEE. *In praise of old houses.*

Andrews, Jane.

Ten boys who lived upon the road from long ago to now. Lothrop, \$1.00
